

# DID YOU KNOW?

The Carlisle HVAC Mobile Sealant Delivery System provides an overall labor and cost savings of up to 65%.

-  The Delivery System's customized cart is designed to keep the jobsite clean and provides easy portability.
-  The Carlisle HVAC sealant application takes about 1/5 of the time compared to the bucket and brush method.
-  The Carlisle HVAC sealants are engineered to spray through a smaller tip versus the competitor's products.
-  Controlling the applied amount minimizes overspray, resulting in less product waste.
-  All of the Carlisle HVAC sprayable sealants are low VOC, water-based, LEED compliant products.

Spraying through a smaller tip gives the user more control over the amount of product being applied as well as the speed of application.

RS-100™ is a robotically applied, blue duct sealant that is used on the interior of unlined ductwork.

- ❓ Carlisle HVAC offers a top of the line spray gun that allows for tip rotation to swiftly fix a clog and quickly resume spraying.
- ❓ Spray-Seal™ is a gray duct sealant that is utilized on the exterior of ductwork.
- ❓ Spraying duct sealants decreases labor substantially and increases productivity while using less material.
- ❓ Carlisle HVAC's sprayable duct sealants allow for duct vibration and movement without cracking and leakage due to its flexibility.
- ❓ RE-500™ is a robotically applied duct sealant in white or black that is applied on the interior of insulated ductwork.

“ Hardcast Spray-Seal™ is revolutionizing the way we seal and test the ductwork. ”

—Mark Spiezio,  
Mid-Atlantic Mechanical VP of Operations

- ❓ RE-500 provides resistance to mold growth and is ideal for critical projects such as hospitals and schools.
- ❓ Carlisle HVAC's sprayable products do not require an EPA registration, meaning they have minimal to no negative impact on the environment.
- ❓ A Delivery System Repair and Replacement Program is available through Carlisle HVAC.
- ❓ High pressure sealing minimizes re-work and re-testing required with other manual methods.
