

Do the Math!

The Right Company + The Right Product + The Right Delivery System = Cost Savings!

Spray-Seal

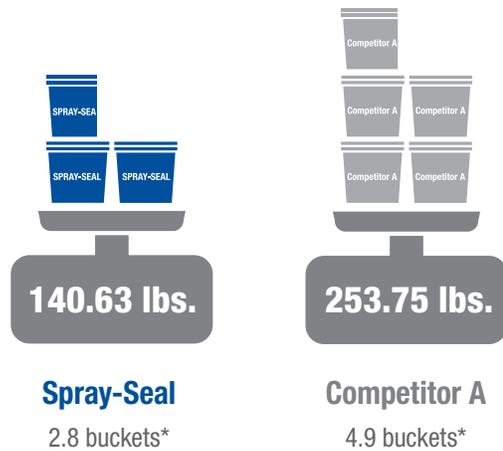

Competitor A

Cost Savings! It all adds up.

Since the introduction of its Hardcast brand in 1965, Carlisle HVAC Products has been the leader in duct sealant technology. Today, the tradition of innovation and excellence that you've come to expect from the makers of Hardcast continues, with its Spray-Seal™ duct sealant.

Offering unsurpassed labor-savings, pinpoint accuracy and long-term performance attributes, Spray-Seal is an engineered duct sealant that allows contractors to maximize their profitability and pass the most rigorous pressure tests... the first time!

Sealing 250' of Ductwork

Scan here or visit www.carlislehvac.com/?page=dothemath to see how Spray-Seal outperforms the competition.

* According to test results when sealing all transverse and longitudinal seams of identical 8' lengths of ductwork and four-bolt flange using each manufacturer's recommended spray-tip size. All products were applied in identical conditions. Field coverage rates may vary dependent upon pump pressure, applicator experience and coverage rates.
